Recent Developments

The first quarter of 2022 was an excellent start to the year, with the Bank's asset sensitive balance sheet benefiting from the initial increases in interest rates, resulting in improved net interest income and net interest margin. Butterfield expects market interest rates to continue to provide upward momentum to earnings during 2022.

Additionally, the Bank is seeing signs of improving economic activity across its operating jurisdictions, including growing visitor numbers, the return of cruise ships and increasing airlift to Bermuda and Cayman. While not yet back to pre-pandemic levels, visitor numbers are continuing to improve as travel restrictions are lifted and tourists once again seek high-quality destinations.

Capital management continues to be an important focus for Butterfield, including a sustainable quarterly dividend, support for organic growth and potential acquisitions and the flexibility to repurchase shares when appropriate.

The Bank maintained its balanced capital return policy. The Board again declared a quarterly dividend of \$0.44 per common share to be paid on May 31, 2022 to shareholders of record on May 16, 2022. During the first quarter of 2022, Butterfield repurchased 0.1 million common shares under the Bank's current share repurchase plan.
